1. Scope

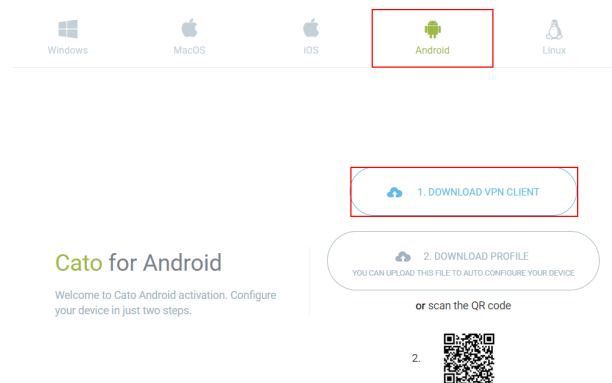

This guide describes how to download, install and use the Cato VPN Client on your Android device.

2. Downloading Your Client for Installation

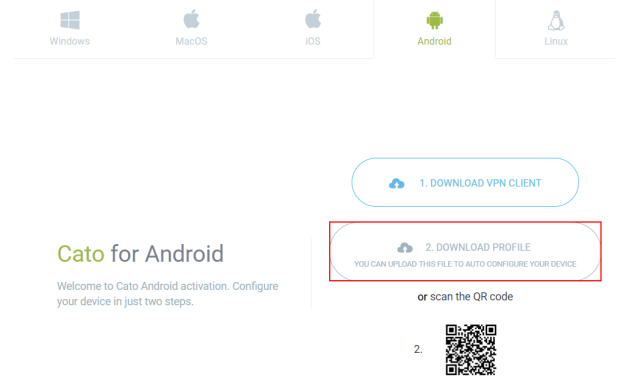

In addition to downloading the Cato VPN Client installation file, you can optionally download a profile file that contains your configuration credentials, and enters your login details automatically.

However, if you prefer, you can enter your credentials manually.

1. Click **Android** and click **1. DOWNLOAD VPN CLIENT**. You will be redirected to Google Play to continue.

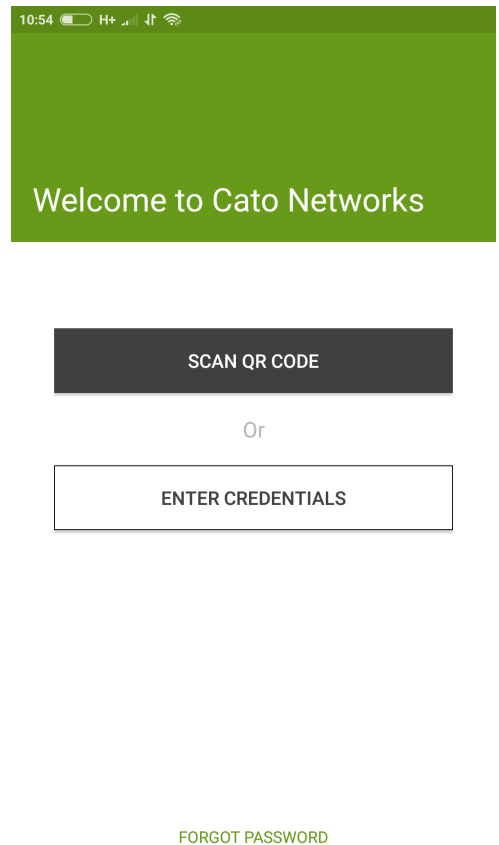

2. Optional - Click **2. DOWNLOAD PROFILE** and note where you saved the file for later use.

3. Logging into Your Cato VPN Client

When you start Cato VPN Client for the first time, you need to configure your account using either of the following methods:

- Scan the QR code on the User Portal.
 - a. Click **SCAN QR CODE**.
 - b. Set the 'Square Scanner' on The QR Code that appears on the User Portal.
- Manually by entering your credentials:
 - a. Click **Enter Credentials**.

- b. Enter your credentials as detailed in the email you received from your administrator and the password you defined.
